Subject: \$10M / Change of venue

Dear Mr. Konish:

If you noticed last night's news from WGFL TV with Briana Harper, I put a dollar figure of \$10 Million on the municipal tax in question. Attached is an updated sheet of my calculations, which Briana has. That sound bite should give GRU something more to think about.

Briana also reported in her piece that GRU claims it is doing nothing different from other municipal utilities. If this is their best defense I will ask for their list of those utilities.

In regard to your thoughts about a local circuit judge; any judge served by GRU would seem to have a conflict of interest by being an owner of GRU. Briana's piece showed The John R. Kelly Generating Station with the phrase on the side of the building "Owned By The People It Serves." A change of venue might be an interesting thought if you're still mulling over civil action?

Have a good weekend,

John Caravella
